When the high accuracy of the Gemini R is not necessary this product offers a cost effective solution for the calibration and testing of infrared thermometers. The Quick Cal Blackbody is ideal for rapid and portable checking of infrared thermometers.

It features a cylindrical cavity 25mm diameter by 115mm deep.

- 30°C to 350 °C
- Emissivity > 0.99
- Controller Resolution 0.1°C

**Model 550 QuickCal Blackbody**

- Temperature Range: 30°C to 350°C
- Display Resolution: 0.1°C
- Heating time: 9 minutes
- Target Size: 25 x 115mm Cavity with end cone
- Stability: ±0.2°C
- Accuracy: ±0.5
- Emissivity: >0.99
- Surface coating 0.98 - cavity gives overall emissivity of >0.99
- Power: 300 Watts
- Voltage: 100-130 or 208-240 Vac
- Dimensions: H 65mm, W 152mm, D 175mm
- Weight: 1.5kg

**How to Order**

Model 550-02 Blackbody Source

Please state voltage required

Optional Carry Case 931-22-51
